Maternal, Infant & Early Childhood Home Visiting (MIECHV) Initiative

2019 Year in Review

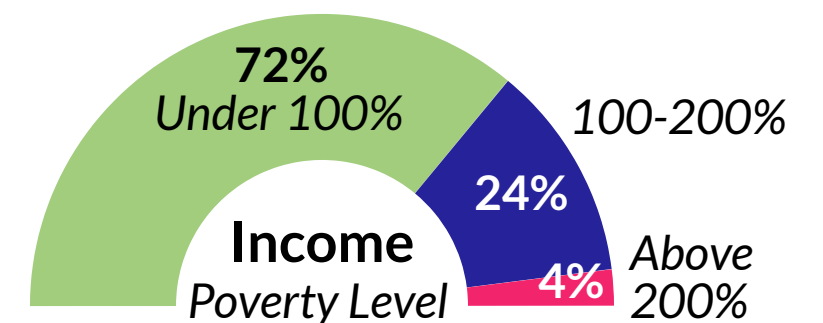

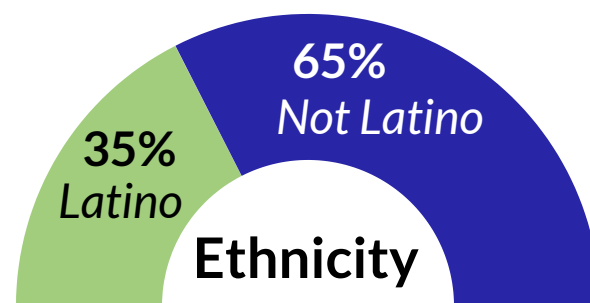

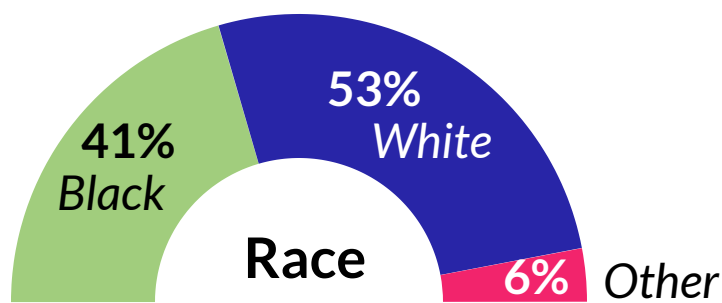

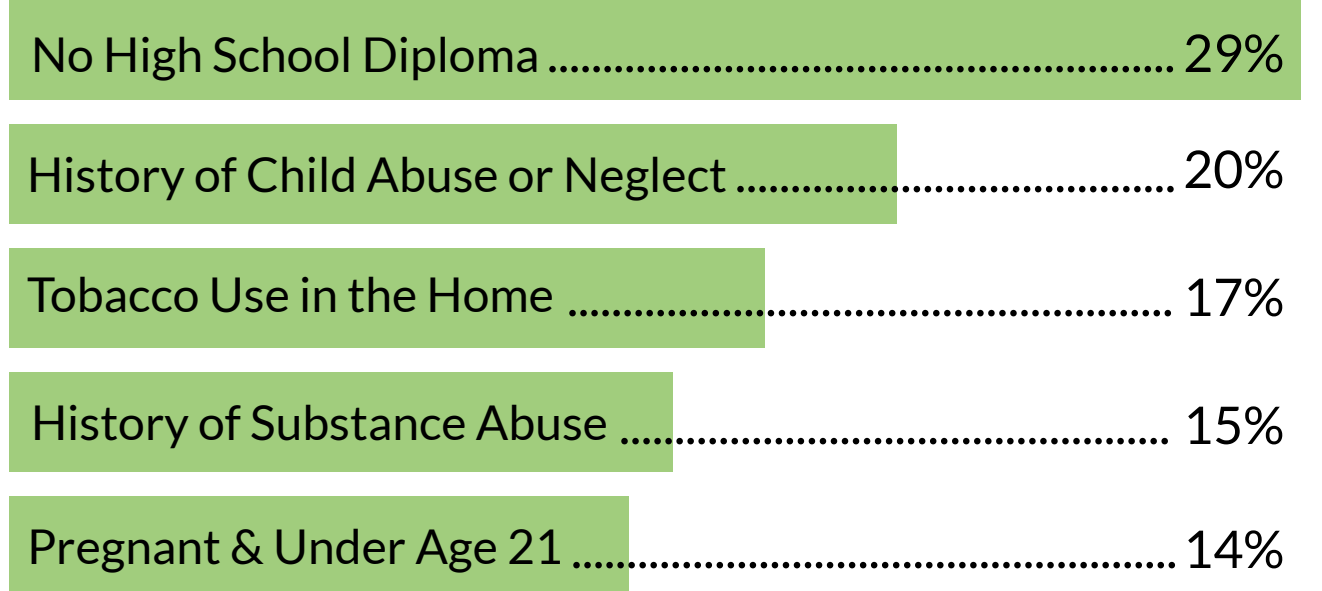

MIECHV Serves Families from Diverse Backgrounds in High-Need Communities in Florida

Florida MIECHV funds local agencies to implement three evidence-based home visiting programs:

Nurse-Family Partnership, Parents as Teachers, and Healthy Families America.

In 2019, MIECHV programs in high-need communities across 30 counties provided more than 35,000 home visits, serving:

2,883 families, including 1,265 pregnant women & **2,423 children**, including 1,759 infants.

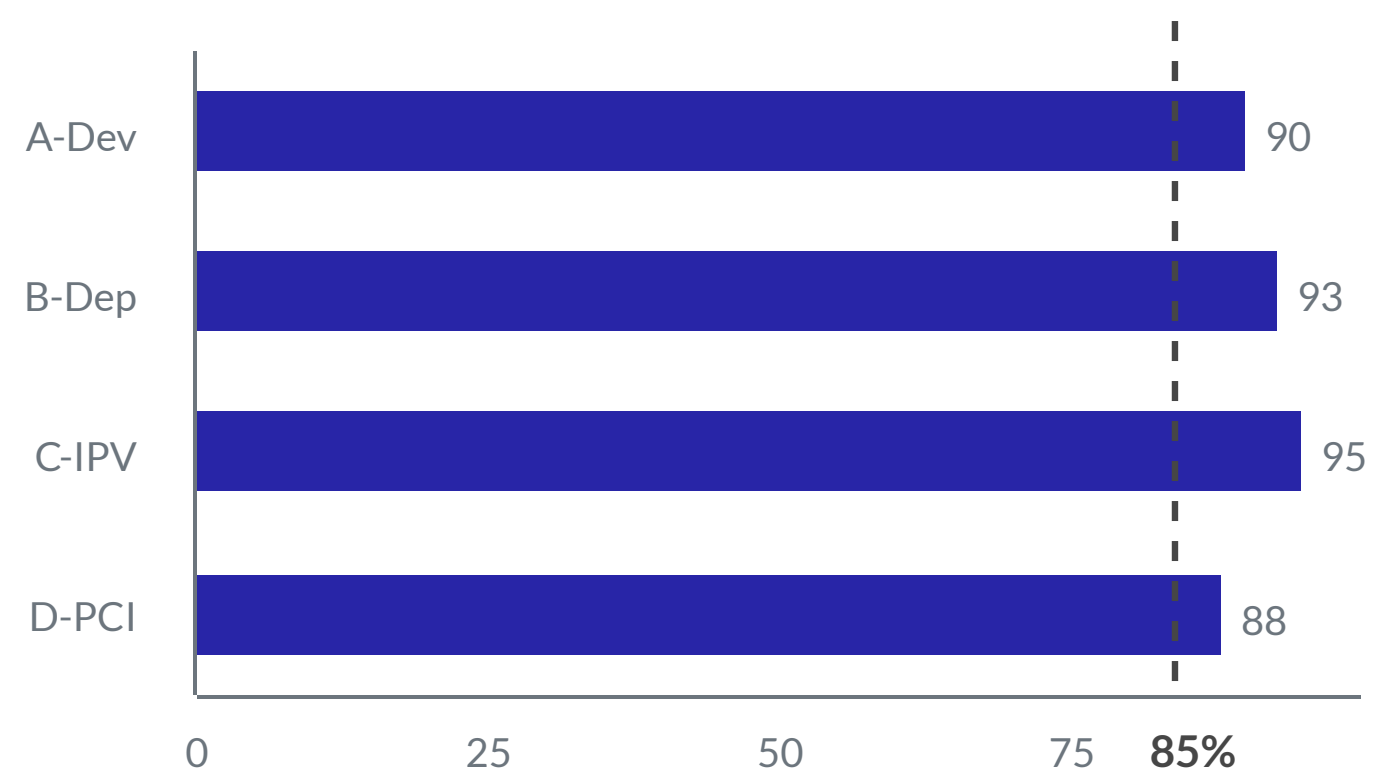

Key Performance Outcomes

- 95%** of enrolled children had no investigated reports of **abuse** or neglect.
- 88%** of mothers initiated **breastfeeding**, surpassing the Healthy People 2020 goal of 82%. More than 38% breastfed for six months or longer.
- 70%** of caregivers reported always using **safe sleep** practices with their infants, compared to 55% national MIECHV average.
- 78%** of enrolled children received their most recent **well child visit**, compared to 67% national MIECHV average.
- 74%** of mothers received a **postpartum health visit** from their provider within 8 weeks of giving birth, compared to 67% national MIECHV average.

Screening & Coordination of Services

MIECHV Programs screen children for Developmental issues (A), their caregivers for Depression (B) and Intimate Partner Violence (C), and both for healthy parent-child interactions (D).

In 2019, screening rates surpassed the 85% target.

- 60%** of children identified with a developmental concern received timely supports and services.
- 96%** of caregivers with a positive depression screen were referred and 53% received mental health services.
- 94%** of caregivers with a positive IPV screen were referred to a certified domestic violence center.
