	19	Intimate Partner Violence Referrals	65%	19/20	95%	99%	50/53	94%	No Change

¹ The 2017 cohort included children served over nine months, compared to the 2018 cohort that included children served over 12 months. The nine-month result for 2018 would be 3.1%.

² This measure changed from measuring PCI completion at one interval for each child in 2017 to measuring PCI completion at the most recent of several intervals for each child in 2018.

For a detailed description of each measure, review the Florida MIECHV Performance Measure Summary Tables:
